

Coding Challenge

Problem Statement:

Problem 1:

You have to use MP Chart Library to inflate a pie chart & a bar chart for a dummy data set.

The dummy data need to be shown in table and below table the chart should be inflated.

Dummy dataset should have data for 5 commodities/segments.

OnClick event on any segment of pie chart or on any bar of bar graph should pop-up a dialog box showing some message.

Dataset should be stored in sqlite database.

Problem 2:

Demonstrate use of Coordinator Layout & Collapsing Toolbar.

Note : Main motive behind this to check your coding skills. Do share the code although you fail to meet all the tasks. For any clarification email at avinash@etaminepgg.in or call @ **9716848155**.
